# Google API Console

## Create a Project

Please follow the steps:

- Visit [Google API Dashboard](#)
- Login using your Google Account
- On the top Click on your Account name
- Select **Create Project**
- Set a project name, it is advised you use your sites domain name
- Continue with Provide Access to eSG

## Provide Access to eSG

Please follow the steps:

- Visit [Google API Dashboard](#)
- Login using your Google Account
- Select your Project from the drop down in the top.
- Click on the Burger Menu (3 dashes on the top left)
- Click on **IAM & Admin**
- Click on **+ADD**
  - Add the following email: **esgdevel@gmail.com**
  - For Role select **Project → Editor**
  - Click on **ADD**

After the process it will take from a few hours to a few days for use to get notified. You can always provide is with the name of your project or the direct link of the project, this way our engineers can have access immediately.
