Joomla Enable SEF

To enable SEO for your Joomla site:

- Login to administration (i.e. <https://domain.tld/administration>)
- In the top left click on System and then Global Configuration

- In the SEO Settings section enable “Search Engine Friendly URLs” & “Use URL Rewriting”

SEO Settings

Search Engine Friendly URLs	<input checked="" type="radio"/> Yes <input type="radio"/> No
Use URL Rewriting	<input checked="" type="radio"/> Yes <input type="radio"/> No
Adds Suffix to URL	<input type="radio"/> Yes <input checked="" type="radio"/> No
Unicode Aliases	<input type="radio"/> Yes <input checked="" type="radio"/> No
Include Site Name in Page Titles	<input type="text" value="Before"/>

- Enabling “Adds Suffix to URL” will add .html to most pages (this will depend on the MIME type), for example <https://domain.tld/index.html> or <https://domain.tld/index.php>
- Enabling “Unicode Aliases” will use the exact text in the alias of each object instead of using transliteration for non ANSI aliases.

Create .htaccess

You will need to create or modify .htaccess in your plan.

Command Line

After you login:

```
cd public_html  
touch .htaccess  
cat htaccess.txt >> .htaccess
```

Please note that this will just append the contents of the default Joomla htaccess.txt to the current .htaccess if it exists or create a new one if it does not exist

cPanel

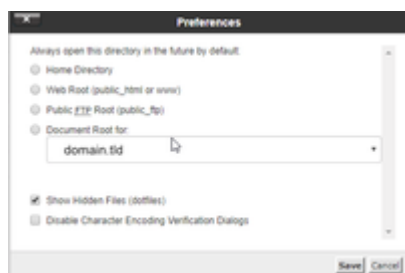

1. Go to the File Manager

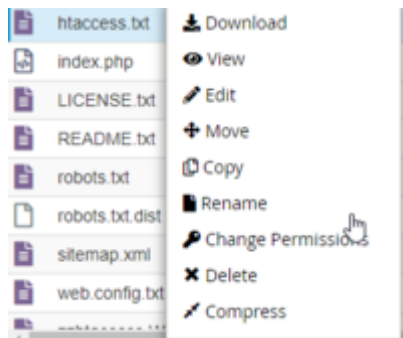

1. Go to the public_html directory
2. From the top right click on Settings

1. On the Pop Up make sure the option **Show Hidden Files (dotfiles)** is Selected

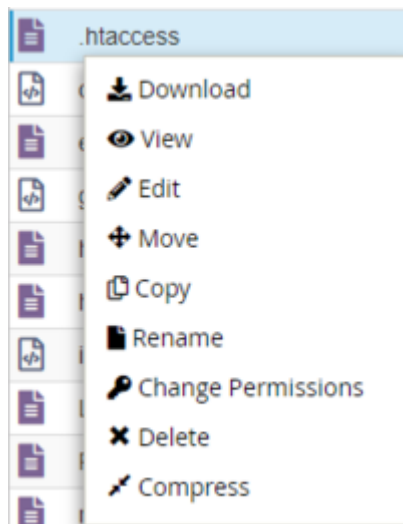

1. Open the htaccess.txt file (Right Click → Edit → Edit) and select its contents **CTRL+A** and copy them **CTRL+C**

1. Close the Editor from the top Right button (Close)

1. Open the .htaccess file and paste the contents you copied in the end of the content in the file
CTRL+V

1. Click on Save Changes on the top right

This is the default htaccess for Joomla 3+

htaccess.txt
