Difficulty

Very easy

Clear DNS

Operating Systems

Windows

XP, 2000, VISTA, 7, 8, 8.1, 10

Open a Command Prompt with Administrative Privileges and type

- `ipconfig /flushdns`

MAC OS

10.10

Open a Terminal and type

- `sudo discoveryutil mdnsflushcache`

- `sudo dscacheutil -flushcache`

10.7, 10.8, 10.9

Open a Terminal and type

- `sudo killall -HUP mDNSResponder`

- `sudo dscacheutil -flushcache`

10.2, 10.3, 10.4, 10.5, 10.6

Open a Terminal and type

- `sudo dscacheutil -flushcache`

Linux

systemd

Open a Terminal and type *

```
resolvectl flush-caches
```

nscd

Open a Terminal and type

- Restart service

```
service nscd restart
```

- Reload Service

```
service nscd reload
```

dnsmasq

Open a Terminal and type

- Restart service

```
service dnsmasq restart
```

BIND

Open a Terminal and type

- Restart service

```
rndc restart
```

- Flush specific domain

```
rndc flushname domain.tld
```

- Flush view (LAN)

```
rncd flush lan
```

Routers

CISCO

IOS

Switch to enable mode

- Clear specific domain

```
clear host domain.tld
```

- Clear all domains

```
clear host *
```

Juniper

JunOS

- Clear all domains

```
clear dns
```

- Clear specific domain

```
clear security dns-cache domain.tld
```

FritzBox

The latest versions of the firmware do not allow for telnet, in those cases a router restart is required

Enable Telnet mode by dialing: #96*7* Connect with a telnet client to the router and type

- Stop DNS Service

```
multid -s
```

- Start DNS Service

```
multid
```

Other Hardware

Synology

DSM 6,7

As a root user use the following to restart named.

```
synoservice --restart pkgctl-DNSServer
```

Web Browsers

Google Chrome

Visit the following URL

```
chrome://net-internals/#dns
```

In the page click on the Clear host cache button.

Microsoft Edge

Visit the following URL

```
edge://net-internals/#dns
```

In the page click on the Clear host cache button.
