nginx Common Issues

upstream sent too big header while reading response header from upstream

Direct Servicing Content

Change your fastcgi buffers

```
fastcgi_buffers 16 24k;  
fastcgi_buffer_size 128k;
```

as Proxy

Change your proxy buffers

```
proxy_buffers 16 24k;  
proxy_buffer_size 128k;  
proxy_busy_buffers_size 128k;
```

In both cases try to find the appropriate buffer size, the sizes posted here are for illustration purposes but should work in 80% of cases.

Also note that in case of long polling services you should turn off the proxy buffers using:

```
proxy_buffering off;
```
