Build VIM on centos 6 ,7

You should remove all vim packages before the following.

Install centos compilers

```
yum groupinstall 'Development tools'
```

Requirements

```
yum install ncurses ncurses-devel lua-devel.x86_64
```

Build & Install

```
git clone https://github.com/vim/vim.git
cd vim/src
./configure --prefix=/usr --with-features=huge --enable-rubyinterp --enable-
pythoninterp --enable-luainterp
make
make install
```

Cleanup to recompile

```
make distclean
```
