Firewalld

SNMPD

Create Profile

```
vim /etc/firewalld/services/snmp.xml
```

```
<?xml version="1.0" encoding="utf-8"?>
<service>
  <short>SNMP</short>
  <description>SNMP protocol</description>
  <port protocol="udp" port="161"/>
</service>
```

Add Rule

```
firewall-cmd --reload
firewall-cmd --zone=public --add-service snmp --permanent
firewall-cmd --reload
```
